25 OCT 1971

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : Revision of Utilities Almanac

1. Your copy of the Alternative and Reserve Utility Capacity Almanac for the Headquarters complex has been revised to reflect information current as of 15 October 1971 and is attached for your perusal and retention. The primary changes from the previous edition of this almanac are as follows:

- a. Plans for the improvement of the emergency power system, page I-10, were updated and expanded.
- b. Drawings showing the emergency power source for lighting in the DCI and DD/S areas were added, pages I-11 and I-12.
- c. The number of telephone lines in use, page II-3, was updated.
- d. The description of the primary air-conditioning system, page III-2, was revised to reflect the recent addition of two new chillers in the powerhouse.
- e. Tables describing the supplementary air-conditioning systems and package air-conditioning units, pages III-5 and III-6, were revised.
- f. Photographs of one of the new 1400-ton chillers and the new cooling tower cell were added, pages III-8 and III-9.

2. This almanac is periodically updated and, in the interim, you will be advised whenever significant changes are made to any of our Headquarters utility systems.
